

Monitor Arms

A range of single, double, triple and quad flat screen monitor arms

Overview

Monitor arms are a desktop system which both reduces desktop clutter, and allows flexibility by adjusting your monitors height and position. Integral cable management clips ensure that there are no trailing leads, and universal Vesa plates mean that the arm can be used with all Vesa 75/100 monitors.

The arms themselves are fully height and length adjustable, and can fold flat against a panel. Stocked in silver as standard, white and black monitor arms are available on request

Standard Products

MON1

Height adjustable single flat screen arm,
with desk clamp and through desk fixing

MON2

Height adjustable double flat screen arm,
with desk clamp and through desk fixing

MON3

Height adjustable triple flat screen arm, with
desk clamp

MON4

Height adjustable quad flat screen arm, with
desk clamp

Features

Cable Management

Monitor arms feature integral cable management, to ensure tidy cables from the desktop to the monitor.

Cables can be inserted into the monitor arm itself at the desk level.

Exiting from the top of the monitor arm, cables can be secured using cable management clips along the length of the arm.

Cables are routed directly to the monitor itself, no more desktop cable clutter

Cable Management

360° rotation, and -85°~15°
tiltable monitor mount

Adjustable monitor arm height

±180° monitor arm swivel

Fully adjustable desk clamp
